# FERNO Paraguard Excel Stretcher

## Depend on NATO's stretcher of choice for search and rescue operations

If you're looking for an excellent all-round proven search and rescue stretcher, Ferno's Paraguard Excel is without equal. Compact and easy to use, with a design that's perfect for both horizontal and vertical lifting, it's little wonder that the design has gained approval and is used by many authorities and organisations globally, including NATO.

- **Ideal for use in awkward spaces** – designed for use and performs highly effectively in difficult environments, collapsed buildings, industrial accidents or confined spaces
- **Easy to transport** – Slot-in carrying handles attach to head and foot ends of the stretcher allowing two rescuers to more easily carry the casualty
- **Quick and simple to use** – colour-coded strapping system allows for easy securing of the chest, arms, thighs and lower legs
- **Safe and secure** – a three-point non-slip forehead strap holds the head in place, ensuring effective head immobilisation, a figure of eight strap used to hold the feet to avoid any slippage of the occupant
- **Hygienic and easily maintained** – impervious to oil, water and grease, rot-resistant and with easy-clean fully heat-sealed edges to ensure effective infection control
- **Recognised and proven** - approved for use by many authorities including NATO, NSN ref. 6530-99-446-9403
- **Easy to store** - for storage and ease of transport, the stretcher packs into a versatile valise back pack which is supplied with each unit

## Options and Accessories

- **Lifting sling for easier horizontal lifting** – attachable four-point lifting sling with lightweight karabiners and 227kg max load
- **Shoulder harness to help distribute weight** – vest-style, to attach onto the Paraguard lifting handles
- **Foul weather sheet to protect the casualty** – wraps over the patient for use in adverse weather conditions
